

Grades 6-8 | Discussion Questions

Digital Footprint

- What is a “digital footprint”?
- What does it mean that your digital footprint can be “searched”?
- Have you ever had an experience when something you said or did online was copied and shared?
- Think about three websites you use. Who sees the information you share on each of those sites?
- Do you know anyone who has a really positive digital footprint? What kind of information does he or she share?
- Because your footprint is permanent, information you share now might be seen in the future. If a college saw your digital footprint right now, do you think it would help or hurt your chances of getting in? Are there any ways you can create a more positive digital footprint?
- Does logging off a website or deleting your account erase your digital footprint?
